

Floral Foam Guide

Different flowers need different supports and have different saturation rates. Ensure your arrangement uses the most suitable foam to ensure long lasting floral arrangements.

Foam Bricks

The brick is a staple shape with high density premium floral foam providing quick saturation and strong support. Bricks are great for thick and heavy stemmed floral arrangements & are also suitable for most everyday arrangements with finer stems. Bricks also come in jumbo sizes.

Posy Pads

Posy Pads are a multipurpose shape for creating a wide range of designs including funeral tributes, gifts, floral decoration, table centrepieces and domes. They come in a range of sizes and plastic or cardboard bases.

Bridal Bouquets

Save time when arranging a bridal bouquet with bridal floral foam to keep flowers fresh the entire wedding day. Bouquet holders with angled heads are ideal for creating smaller bridesmaid bouquets. Bridal bouquets come in a range of sizes and decorative handles.

Cages & Trays

Floral Foam with cages provide a strong support for longer lasting arrangements. The cages are sturdy and solid to provide smooth transport for arrangements. Cages provide secure fastenings and are available in difference sizes and shapes. Cages are suitable for large floral sprays, altars, stages and mantels.

Spheres & Nettings

Precut spheres are ideal for topiary trees, hanging arrangements, flower bombs and spherical table centrepieces. Plastic netting makes it easy to hang your arrangements securely and come in a range of sizes.

Wreaths & Design Rings

Wreaths and design rings are floral foam rings that are used to create table decoration centrepieces, gift, funeral, sympathy and tribute arrangements. Design rings have a complete plastic base centre which can be filled with decorative items. Wreaths have a hollow centre.

Crosses & Shapes

Floral foam comes in assorted shapes and sizes. Crosses are super strong in a variety of bases. Some contain a water reservoir for long life and a plastic lip provides support for foliage and decorative ribbon.

Dry Foam

Dry bricks are perfect for arranging everyday, dried and silk floral arrangements. Stems are held firmly in place by the high density foam providing a secure and stable base. Easily cut & glued & are also fire retardant.

Foam tips

Make sure to use high quality floral foam. This will keep flowers fresh longer which also reflects on your reputation. See our floral foam soaking guide for an air-bubble free method on how to soak your floral foam to ensure maximum floral life.

“Use high quality floral foam to ensure long life arrangements that not only make the day a success but also reflect on your reputation.”
